FOR IMMEDIATE RELEASE

## **Open Therapeutics LLC Acquires Majority Stake of Pilus Energy Subsidiary from Tauriga Sciences, Inc.**

CINCINNATI, Ohio – [Open Therapeutics™](#) has acquired an 80 percent majority stake in Tauriga Sciences, Inc.'s wholly owned subsidiary, Pilus Energy LLC, according to Jerome Hamilton, CEO of Open Therapeutics. Tauriga Sciences, Inc. is engaged in building businesses in the life sciences space.

Following its acquisition, Open Therapeutics plans to open the technology and freely provide it to the global community, says Hamilton. The technology involves removing polluting carbon compounds and generating electrical current. It also kills certain water-borne bacterial pathogens providing a significant public health opportunity. Hamilton says that Open Therapeutics is looking at the agreement with Tauriga as a means of creating the potential for Pilus Energy to become successful in commercializing its technology.

“We have a vision to continue that process for Pilus Energy,” says Hamilton, adding that the acquisition will create public health synergy with Open Therapeutics, which launches its new scientific crowdsourcing platform in late Q1 2017, which will be known by its brand name, Therapoid™. The web platform enables bio researchers around the world to freely collaborate around open therapeutic biotechnologies. The platform will accelerate the distribution of research results, particularly to underserved markets. Researchers can then publish their findings in prestigious journals.

### ABOUT OPEN THERAPEUTICS™ LLC

[Open Therapeutics™](#) is an eight-year-old company that curates and develops open medical, biopharma, and synthetic biology-based biotechnologies. Among the biotechnologies being freely opened to the global community are essential proteins for

developing antibiotic and anticancer therapeutics, immunotherapy, oncolytics, biomarker inducers, synthetic biology, and chemotherapies. The Company, formerly Microbial Robotics, LLC before changing its name change to Open Therapeutics in early 2016, is headquartered in Cincinnati, Ohio. It has laboratory operations in Covington, Kentucky, and Madrid, Spain via its strategic partner, Bacmine SL ([www.bacmine.com](http://www.bacmine.com)). For additional information, please visit Open Therapeutics' website at <http://opentherapeutics.org/about-us/>.

#### ABOUT TAURIGA SCIENCES, INC.

Tauriga Sciences, Inc. is a fully reporting life sciences company engaged in the development, marketing, distribution and potential licensing of a broad array of products and technologies that may help individuals who are affected by muscle tension. The Company has already identified potential products and technologies of interest and is actively working towards the goal of creating an innovative product line to launch the business activities of ColluMauxil Therapeutics LLC (The Company's previously announced new planned wholly owned subsidiary).
